ACTA MECHANICA SOLIDA SINICA

LIST OF CONTENTS

1991

A stochastic theory of cumulative fatigue damage
..... WEI–QIU ZHU and YING LEI (1–1)

Dynamic response of a rigid plastic simply supported imperfect beam subjected to a uniform intense dynamic loading
..... JIA–LING YANG and TONG–XI YU (1–15)

Analogy between antiplane shear waves in anisotropic and isotropic media
..... HAI–CHANG HU (1–33)

A numerical method for Cauchy principal value of singular integral under parametric transformation in BEM
..... AN–PING WANG, YONG–JIE JIN and QING–HUA DU (1–39)

A new approach to on–line vibration monitoring and fault diagnosis
..... GUAN–LIANG QIAN, SONG–NIAN GU and JIE–SHENG JIANG (1–49)

A constitutive model and elastoplastic analysis of structures under cyclic loading
..... XU–CHENG WANG, YU–TIAN LEI and QING–HUA DU (1–65)

A closed form solution for stress intensity factors of shear modes for 3–D finite bodies with cracks by energy release rate method ..... QI–ZHI WANG,
..... XING ZHANG, QING–ZHI HE and BING–YI REN (1–75)

Inertial effects of hypoelastic cylindrical bar of grade zero under simple extension of constant velocity
..... ZHONG–MIN CAI (1–89)

A fracture damage model for jointed rock masses and its application to the stability analysis of dam abutments
..... WEI–YUAN ZHOU and YAN–YI YANG (1–101)

A rate type generalized variational principle
..... SHAN–YUAN ZHANG (2–117)

On the strategy for processing modal shapes with clustered natural frequencies
..... HAI–CHANG HU, DE–CHANG CHEN and XIANG–DONG HE (2–127)

On the new forms of the motive differential equations of the mechanical system relative to non–inertial frame
..... JIE–FANG ZHANG (2–139)

Experiment of active control using electromagnetic force
..... DA–YUE CHEN, ZONG–WU HU and ZU–YAO FAN (2–153)
Shell vibrations at high–frequency
..... RUO–JING ZHANG and WEI ZHANG (2–163)
An identification method of generalized modal parameters of linear vibration defective systems
..... GUO–QIN SHI, DE–CHAO ZHU and JUN–KUI WANG (2–175)
Investigation of the influence mechanisms of resin matrices on the strength of filamentary structures
..... TIAN–JIAN LU and XIN JI (2–189)
Magnetoelastic buckling of Tokamak superconducting toroidal field coils
..... GE–FENG FANG, HUI–CAI XIE and DE–MAN WANG (2–207)
The solution of stress intensity factor for mode II cracking in orthotropic cracked plate by complex variable–variational method
..... DE–YU CUI and XING ZHANG (2–219)
Gibbs–Appell's equations of variable mass controllable mechanical systems in terms of quasi–velocities and quasi–accelerations
..... YONG–FEN QIAO,YUE–LIANG ZNANG and QING–WEN YUE (3–231)
Toughening analysis of mode III crack in transformation toughened ceramics
..... QING–PING SUN,
..... YONG HUANG, SHOU–WEN YU and KEH–CHIH HUANG (3–251)
Solving material nonlinear structural problems by a finite analytic method in local coordinates
..... KE–RANG DUAN and JIAN–SAN LIAO (3–259)
Bifurcation of equilibrium of flexible bars subject to eccentric loads
..... EI–HUI WANG (3–273)
An experimental study of rock compression shear fracture nucleus
..... QUN–LI ZHOU, YONG–QIONG SHE and LIANG–ZHI WANG (3–287)
Displacement type unified equation for bending, buckling and vibration of conical shells and its applications
..... YIH HUANG and BO–HUA SUN (3–299)
Free vibration anaylses by boundary element method using component mode synthesis
..... FU–RONG WANG, ZHANG–ZHI CEN and I–CHIN WANG (3–319)
Exact solution of sound reflection on infinite laminated plate and transmission through it
..... BO–HOU XU and DA–JIUN WANG (3–327)

The dynamic thermal stresses in hollow cylinder by thermal shock simultaneous with mechanical shock acting on the inner movable boundary
..... HONG–GANG WANG and YONG–JIN CHEN (3–333)
Experinents on the impact of cylindrical projectiles on thin spherical caps
..... G. KOLLER MARTIN,
..... LONG–MAO ZHAO, JIAN–CHUN MU and GUI–TONG YANG (3–343)
An acoustoelastic method for measuring residual stresses in slightly orthotropic material
..... KE–CHENG WU and LI–QIANG JIANG (4–355)
Higher approximations to the homogeneous solutions for toroid
..... RUO–JING ZHANG (4–363)
Lee's extremum principle and the large deflection response of dynamically loaded plastic structures
..... QING ZHOU and TONG–XI YU (4–369)
The necessary condition for the appearance of chaos in two classes of forced vibration system with both square and cubic nonlinear terms
..... LI–QUN CHEN (4–381)
Cyclo–symmetric modal synthesis of rotating bladed disc system
..... JIN–ZHANG, WEN–LIANG WANG and XIANG–JUN CHEN (4–387)
Stochastic seismic response of long–span structure
..... JIA–HAO LIN, WEN–SHOU ZHANG and WAN–XIE ZNONG (4–403)
Prestressing effect of twisted fiber yarn in composites
..... LI–NING YAO (4–417)
An improvement of the Prandtl–Reuss theory and the hybrid / mixed vari–stiffness method of finite element analysis ..... PING HU and QING ZHANG (4–431)
A singular element for calculating the stress intensity factor
..... HONG–SEN LU (4–443)
Elastic buckling of honeycomb structure under out–of –plane pressure
..... YING–JIAN WANG (4–449)
List of contents 1991 ..... (4–457)
